Professional Development Series

Introduction to WinCASIE III Computer Aided Search Information Exchange

The worlds most efficient search and rescue software the brain child of Dr. David Lovelock from the University of Arizona. Updated from the original dos version this software will help you establish the initial probabilities of areas and update segments when POD's are entered. There are so many features to this update that two days is needed for a general overview with practical exercises. This class is a must for any member of a SAR overhead team member. The software is free and can be downloaded at http://wcasie.com.

16 hour class Fee: $20.00 includes handouts, CASIE 3.
